

# Post Deploy Checklist

Strapi will deploy all of the files to your environment.  
Changes such as policies, endpoints, controllers, services and plugins will always be properly migrated.

However there are a few things that WILL NOT be migrated automatically.  
These settings are stored in the database and as such will need to be migrated manually.

## Are your endpoints active?

The screenshot shows the Strapi Roles & Permissions interface. On the left is a sidebar with a blue header and a dark menu. The menu has three sections: 'CONTENT TYPES' with items 'Articles', 'Books', 'Margarines', 'Orders', and 'Users'; 'PLUGINS' with items 'Content Type Builder', 'File Upload', and 'Roles & Permission'; and 'GENERAL' with items 'Plugins', 'Documentation', and 'Help'. The main area is titled 'Authenticated' with the subtitle 'Default role given to authenticated user'. It has 'Cancel' and 'Save' buttons in the top right. Below the title is the heading 'APPLICATION - Define all your project's allowed actions'. There are four sections for content types: 'Article', 'Order', 'Margarines', and 'Books'. Each section has a 'Select All' button and a table of actions with checkboxes. For 'Article', 'find' is checked. For 'Order', 'create' and 'findone' are checked. For 'Margarines', no actions are checked. For 'Books', 'find', 'create', 'findone', 'delete', and 'update' are checked. On the right side of the main area, there is a grey box with the text: 'actions and click on the cog icon to display the bound route'.

Content Type	count	create	delete	find	findone	update
Article	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Order	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Margarines	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Books	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Go in the Roles & Permissions and check that the endpoints are properly mapped out.

Additionally you could set up automated tests via Postman / an API inspector to ensure the endpoints are working.

## Check your plugins

Check the configuration of your email and upload plugin.  
Are they set up correctly?

Click on plugins then on the

## Check your uploads

Uploads in production and development are separated, you may need to reupload a few items you were working with in your development environment.
